To check user name in Linux:

1.check username using command in terminal

$whoami

2.Create a temporary user

$sudo adduser tempadmin

3.Add new user to sudousers

$sudo usermod -aG sudo tempadmin

4.Now log out from your current account (meghana) via GUI.

5.From the login screen, choose tempadmin and enter the password you just created.

6.Rename your original user (meghana->1RV24MC066_Meghana_GK)

sudo usermod -l 1RV24MC066_Meghana_GK meghana

7.Log out from tempadmin
Again, use GUI ->top-right corner ->Log Out.

8.Verify the renameAfter logging in, open Terminal and run:

$whomai

10.Delete tempadmin:

$ sudo seluser tempadmin
