

PROGRAM 6:

DEPLOY AN AUTOMATED BUILD PIPELINE USING DOCKERHUB

Step1: create a github personal access token (PAT)

Create a new rep on github

Navigate to the settings

>develop setting

>pat

> generate a classic token

Step2:

Create a dockerfile and build the image

>Docker build -t program6 .

Step3:

Tag the image

> Docker tag program6 <dockerhub-username >/ program6
latest

Step4:

Push the image to Dockerhub

Docker login -u <dockerhub-username >
