

PROGRAM 4 : Integrate Git with docker for Source controlled application Build

Step1: Create a folder program 4 and move into the folder

```
>mkdir program4
```

```
>cd program4
```

Step2: create file package.json by command

```
Npm init-y
```

Step3 : create the file [index.js](#)

```
const express = require("express");
```

```
const app = express();
```

```
const port = 3000;
```

```
app.get("/", (req, res) => {
```

```
  res.send("Hello from git + docker integration");
```

```
});
```

```
app.listen(port, () => {
```

```
  console.log(`Server is running at port ${port}`);
```

```
});
```

step4: Add the dependency

step5:: Create a Dockerfile and add similar contents

step6:Create a new GitHub repository

Click New → New repository

Add repository name

step7:Getting a Personal Access Token (PAT)

Go to Profile

Developer settings

Personal access token

Token (classic)

Generate token

Step 8: Initialize GitHub repo locally

```
git init
git add .
git commit -m "initial commit"
git branch -M main
```

step9: Push code to GitHub

```
git push -u origin main
```

The screenshot shows the GitHub interface for a repository named 'prog4' owned by 'sindhura0909'. The repository is public and has 1 branch (main) and 0 tags. The commit history shows an 'Initial commit' by 'sindhura0909' on '05fb50d' from 'last month', with 1 commit in total. The file list includes 'node_modules', 'Dockerfile', 'index.js', 'package-lock.json', and 'package.json', all from the 'Initial commit' on 'last month'. Below the file list, there is a 'README' section with a prompt to 'Add a README' to help people understand the project, accompanied by an 'Add a README' button.
